

EARTHQUAKE PREDICTION, WELLINGTON, NEW ZEALAND, 12 OCTOBER 1977.

Bulletin of the New Zealand National Society for Earthquake Engineering. 1978.

Opening Address	Sir Patrick O'Dea	1
Earthquake Prediction	F. F. Evison	2
The Political and Legal Effects	Sir John Marshall	5
The Economic Issues	G. Thompson	8
Civil Defence Aspects	R. H. F. Holloway	12
The Social Implications of Earthquake Predictions and Warnings on and for Organizations	N. R. Britton	15
The Effect of Earthquake Prediction on Earthquake Insurance in New Zealand	M. Hellberg	19
Role of the Media in Earthquake Prediction	M. Robson	22
Mitigation of Danger to Property	C. M. Strachan	26
The Roles of Central and Local Government in Pre-Disaster Planning	Sir Patrick O'Dea	30
The Police Role	R. S. Mitchell	33
The Effects of Earthquake Prediction on the Ministry of Works and Development	A. G. Stirrat	35
The Implications of Earthquake Prediction for the New Zealand Electricity Department	M. T. O'Brien	37
The Role of Local Bodies	M. Fowler	40
Central Government and Earthquake Prediction	J. L. Roberts	43
Summary of Evening Discussion		48

EARTHQUAKE EPICENTER MAP OF CALIFORNIA SHOWING EVENTS FROM

1900 THROUGH 1974 EQUAL TO OR GREATER THAN MAGNITUDE 4.0 OR INTENSITY V

By Charles R. Real, Tousson R. Topozada, and David L. Parke. California Division of Mines and Geology. Open-File Report OFR 78-4 SAC. 1978. Scale 1:1 000 000. Available from Sacramento District Office, 2815 O Street, Sacramento, CA 95816. (Telephone: 916-445-5716.)

USGS Circulars

Circulars are available free from Branch of Distribution, U.S. Geological Survey, 1200 South Eads Street, Arlington, VA 22202.

C 766-B. Earthquakes in the United States, April-June 1976, by R. B. Simon, C. W. Stover, W. J. Person, and J. H. Minsch. 1977. 27 p.

This circular includes lists of U.S. earthquake data containing date, origin time, hypocenter, magnitudes, and intensities; seismicity maps for the period; isoseismal maps for the larger earthquakes; and detailed intensity data for the ones felt.

C 780 Earthquake Hazards Reduction Program—fiscal year 1978 studies supported by the U.S. Geological Survey, by R. M. Hamilton. 1978. 36p.

The FY 1978 Earthquake Hazards Reduction Program is greatly expanded owing to passage of the Earthquake Hazards Reduction Act of 1977 (P.L. 95-124) in response to increased concern about earthquake hazards. Program balance, scope, and activities are described. A detailed list of projects, grants, and contracts supported by the U.S. Geological Survey includes for each study: title, principal investigator, institution, address, and phone number.

C 785-A. Seismic Engineering Report, January-April 1978 1978. 36 p.

Cumulative Index: Volume 10

SUBJECT INDEX

Animal behavior and earthquakes	2:42-50; 6:231-233
Calaveras fault	1:12-15
California Seismic Safety Commission	6:204-207
Continuous strain measurements	5:187-194
Coping with earthquakes	5:160-161
Crustal deformation	4:120-125
Damaging earthquakes in the United States, 1977	3:108

Earthquake Hazard Reduction Program	4:139-143
Earthquake history:	
Guam	6:236-237
Washington	1:28-33
West Virginia	2:62-65
Wisconsin	3:100-103
Wyoming	4:150-154
Earthquake precursors	1:12-15; 2:51-54; 5:162-164
Earthquake prediction	1:12-15, 20-25; 2:40-41,
